Signature, Date: _____

INSIDE MOUNT

- Mounted inside your window frame.
- Provides a clean, built-in look.
- Leaves attractive woodwork exposed.
- A minimum depth of 10 cm is required for this mount type

Step 1 (Width A)

Because not all windows are perfectly rectangular, measure the width in three places: top, middle, and bottom.

Round all measurements to the nearest 0.5 cm and use the smallest measurement. This will be your ordering width.

STEP 2 (Length B)

Measure the height in three places: left, centre, and right.

Round all measurements to the nearest 0.5 cm and use the largest measurement. This will be your ordering length.
