Notes:

Signature, Date: _____

OUTSIDE MOUNT

- Mounted outside or on top of the window frame
- Creates a taller, more dramatic appearance
- No minimum depth requirement

STEP 1 (A)

Measure the width of the area you wish to cover.

If space allows, we recommend adding 5 – 8 cm (2.5 – 4 cm each side) to help minimise light gaps.

This measurement will be your ordering width and the overall width of the shade.

STEP 2 (B)

Measure the height of the area you wish to cover. This will be your ordering length.
